# X-Small Adult™

## TARGETED HEALTH NUTRITION FOR EXTRA SMALL DOGS FROM 10 MONTHS TO 8 YEARS

### ▼ DENTAL HEALTH

X-SMALL Adult's specialized kibble is tailored in shape, size, texture, and density for the extra small dog's jaw, to promote chewing. Calcium chelating sodium tripolyphosphate is included to help promote optimal oral hygiene by limiting tartar formation.

### Healthy transit

Extra small dogs are prone to digestive issues such as constipation. X-SMALL Adult™ is formulated with an optimal fibre balance, including psyllium, which helps to facilitate intestinal transit. Low Indigestible Proteins (LIPs) contribute to optimal stool quality by helping to limit the amount of indigestible proteins that reach the colon.

### ▼ COAT CONDITION

An extra small dog's skin and coat are a reflection of their overall state of health. X-SMALL Adult™ is formulated with anti-inflammatory omega 3s (EPA and DHA), vitamin A, biotin, and highly digestible proteins to help contribute to a healthy skin and coat.

### ▼ URINARY TRACT HEALTH

X-Small Adult is specifically formulated to encourage a healthy urinary pH with a precise mineral balance to promote optimal urinary tract health, reflecting the higher prevalence of urinary issues in extra small dogs.
